Professional Summary

Product Manager specializing in experimentation-driven software delivery, feature ownership, and measurable rollout strategies. Experienced in leading cross-functional teams, translating strategy into backlog execution, and connecting product releases to business KPIs and customer outcomes.

Professional Experience

Product Owner / Product Manager / EBA – Grainger, Chicago, IL (Oct 2022 – Present)

- Driving the LaunchDarkly project unification initiative, aligning teams under a standardized experimentation governance framework.
- Owned cross-functional delivery of modernized Product Detail Page (PDP) and Order History experiences on mobile, coordinating engineering, UX, and business stakeholders from requirements through release, enhancing customer usability and supporting platform modernization goals.
- Owned end-to-end delivery of mobile feature enhancements, translating strategic objectives into prioritized backlog items delivered across sprints.
- Led experimentation and A/B testing strategy using LaunchDarkly to enable controlled rollouts and measurable product impact.
- Designed and operationalized an experimentation maturity model aligning feature evaluations with defined business KPIs.
- Built SQL-based analytics foundations in Snowflake enabling faster rollout decisions and improved KPI visibility.
- Partnered with engineering, UX, architecture, and analytics teams to ship incremental product capabilities improving mobile customer experiences.
- Defined and maintained a KPI-driven roadmap timeline aligned with quarterly goals and strategic deliverables.
- Reduced rollout risk through guardrail metrics and progressive deployment practices.
- Facilitated Agile/Kanban ceremonies, surfaced blockers and tradeoffs, and improved cross-team delivery alignment.

Quality Engineering Lead – DAIS Technology, Chicago, IL (Oct 2018 – Oct 2022)

- Directed QA strategy for an insurance platform connecting agents, carriers, and policyholders.
- Defined and executed BDD-based test strategies during planning and grooming.
- Expanded automation coverage across API and UI layers.
- Conducted functional, integration, performance, and security testing.
- Mentored cross-functional teams and managed release processes.

Senior QA Engineer – Uptake, Chicago, IL (May 2015 – Oct 2018)

- Ensured quality for industrial predictive analytics platform through test strategy development and execution.
- Developed and integrated automated tests into CI pipelines.
- Mentored team members and contributed to QA documentation.

QA Analyst – Guaranteed Rate, Chicago, IL (Feb 2014 – Mar 2015)

- Defined and executed manual test strategies.
- Performed extensive testing including Single Sign-On functionality.

QA Analyst Internship – Resultly, Chicago, IL (Nov 2013 – Dec 2013)

- Conducted mobile testing (iOS and Android), exploratory, smoke, and regression testing.
- Documented defects and produced detailed test reports.

Technical Toolbox

Experimentation & Feature Flag Strategy

LaunchDarkly (Project Unification, Large Segments, Canonical Identifier Strategy), Progressive Rollouts, A/B Testing Frameworks, Holdout Groups, Experiment Governance, LaunchPoint CLI Automation

Product Analytics & Visualization

SQL, Snowflake, Data Modeling (Exposure → Outcome Schema), KPI Mapping, Streamlit, Power BI (conceptual), eazyBI, DORA Dashboards

Observability & Risk Management

Datadog (APM, RUM, Span Tagging), Guardrail Metrics, Progressive Rollout Monitoring

Engineering & QA Foundations

Selenium, CI/CD Workflows, Jenkins, Git/Bitbucket, TestRail, Charles Proxy, API Mapping & Gap Analysis

Product & Delivery Leadership

Jira (JQL), Kanban, Confluence, LucidSpark, Story Mapping, ADR Documentation, Cross-Functional KPI Alignment

Education

- Java Programming for Testers and Test Automation (Selenium) – Forte Knowledge (2015)
- QA Manual and Automation (QTP, Selenium WebDriver) – Forte Knowledge (2013)
- Bachelor of Technology in Industrial Management Engineering and Information Technology – SCE College of Engineering, Israel (1998 – 2001)
